

WiMER Uno is a single data capturing device for Mitutoyo calipers and micrometers. It has a standard 10 pin connector for Mitutoyo digimatic SPC data cables. Data capturing is triggered by a foot switch or a hand trigger switch or the data button on data cable. Captured data will be wirelessly transferred to iOS/Android/Windows devices via Bluetooth Low Energy.

Key Features

- Dimension: 2.50 x 1.63 x 0.80 in
- Wireless Communication Range: up to 10 m
- Gage Connector: Mitutoyo flat 10-pin
- Trigger Button Connector: 2.5/3.5 mm audio jack
- Working Temperature: 0-50 °C
- Power Supply: Rechargeable LiPo battery
- Battery Life: 50 hr
- Charging: 5 VDC USB and 110 VAC
- No receiver needed for iOS/Android devices
- A small USB dongle required for Windows

Compatible Mitutoyo Instruments

- Caliper 500, 551, 552, 573
- MicroMeter 227, 293, 314, 317, 323, 324, 326, 331, 342, 343, 369, 389, 395, 406, 422
- Depth Gage 571
- Height Gage Series 192, 570, 574
- More

Apps Features:

- Free engineering Apps/Software iOS/Android/Windows
- Multiple devices simultaneous reading
- Max, Min, TIR
- Customizable reading decimal accuracy
- Data voice read with 10+ languages
- Data record and CSV export
- Keyboard input for Excel/Notepad on PC
