Wireless Measurement Read

WiMER1+ User Guide

Important Notes
- Turn off the device after use. It will NOT turn off automatically.
- Do NOT open the device. Opening causes permanent damage and avoids the warranty.

Description
1. On/Off Switch – slides to turn WiMER1+ on/off
2. Micro USB – connects to data cable to receive signals from the measurement instrument; connects to charging cable to recharge WiMER1+
3. Trigger Button – records single reading in single record mode (if activated)
4. Antenna – connects to external antenna
5. On/Off LED – turns on blue when WiMER1+ is on
6. CHG LED – turns on red when the device is in charging. It changes to green when the battery is fully charged

- User Guide

Software/App
- iOS: DialRead, DialReadPad, MultiGage Reader (from App Store)
- Android: Dial Reading (from Motionics website)
- Windows PC: Dial Reading (from Motionics website, dongle required)

Quick Start

DialRead, DialReadPad
- Turn on WiMER1+ and connect it to a Mitutoyo instrument.
- Run one of the aforementioned Apps.
- In the main page, tap **Pair** button to bring up a new pairing page.
- Wait for the app to finish scanning nearby devices, tap the name **WiMERPXXX** to connect.
- Once paired, **New Measurement** button turns into dark blue. Tap it to start reading and collecting data.
- To disconnect WiMER1+, tap **Unpair** button in the main page.

MultiGage Reader (for reading from multiple devices)
- Turn on WiMER1+ or other devices and connect them to Mitutoyo instruments.
- Run **MultiGage Reader** App.
- In the main page, tap **Pair** button to bring up a new pairing page.
- Wait for the app to finish scanning nearby devices, select one or more devices and tap **Connect** button to connect.
- Once paired, each WiMER1+ will be assigned a panel in the main page to display its readings.
- To disconnect one WiMER1+, tap **Disconnect** button next to it.
- To add more devices, tap **Pair** button again.
